Riherd explained they will move forward with contacting affected landowners and beginning soil inspections and environmental impacts.

During the Engineer's update Riherd shared the Sinclair temp bridge panels are being moved and set this week for two other bridges in the NW section of the county. One bridge is located on 180th Street NW of Bristow and the second in the far NW section of the county on 105th Street. They are also working on some extension mowing of right of ways as it is their goal to mow fence line to fence line in one quarter of the county each year. Barnett asked about the county's participation in the City of Shell Rock's repaving of Cherry Street and Riherd explained the financial responsibility of the county for the roadway portion of that project. In addition, Riherd discussed a bump on Sinclair that has signage posted and the bump with one-lane traffic on the Packard bridge this week.
